Equinox Solid Tiled Roof
Edwardian roof with SlateSkin sheet tiles

Bright, spacious and airy, your conservatory is a great addition to your home. But as the seasons roll by, changing temperatures can make it uncomfortable to be in – too hot in summer and too cold in the winter months.

The Equinox tiled roof is the perfect solution. Combining high-quality precision engineering with attractive styling inside and out, you'll be adding valuable extra usable space to your home without the high cost of building an extension. It all goes to make the Equinox tiled roof the best value way to improve your lifestyle.

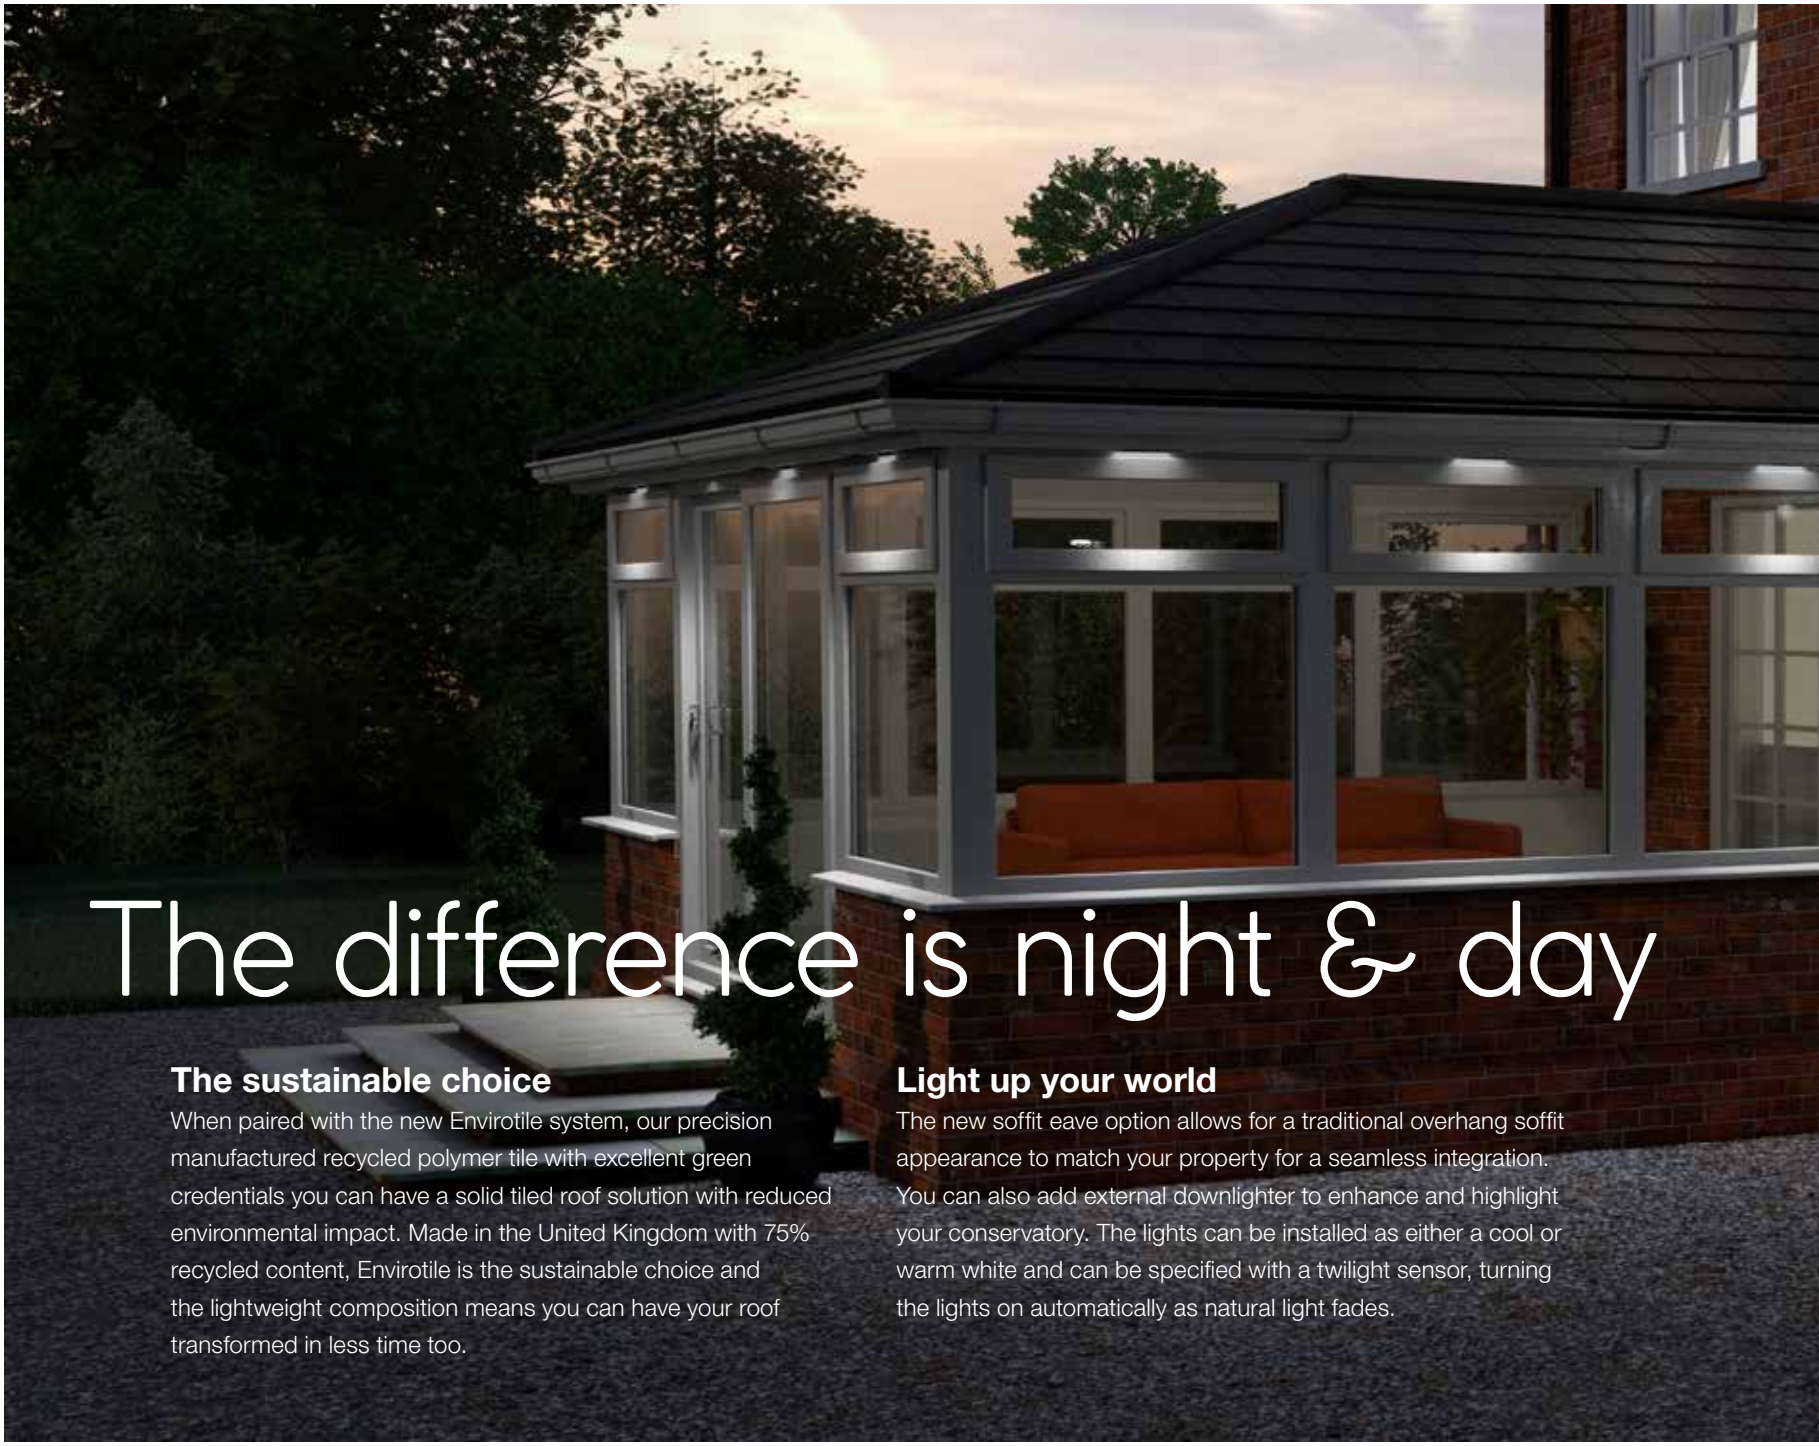
A space to enjoy all year round

Equinox Vega Glazed Solution
Gable ended roof with Vega glazing panels, Composite Slate tiles and overhang feature

Enjoy your conservatory all year round with an Equinox tiled conservatory roof. With a tiled roof, you can use your conservatory whatever the weather – because it won't become too hot in summer or too cold in winter. Thanks to the new Equinox system, you can turn your extra space into an integral part of your house, while still enjoying the added light a conservatory provides.

"We can now use our conservatory just as we would any other room."

Homeowner, Barnsley



The difference is night & day

The sustainable choice

When paired with the new Envirotile system, our precision manufactured recycled polymer tile with excellent green credentials you can have a solid tiled roof solution with reduced environmental impact. Made in the United Kingdom with 75% recycled content, Envirotile is the sustainable choice and the lightweight composition means you can have your roof transformed in less time too.

Light up your world

The new soffit eave option allows for a traditional overhang soffit appearance to match your property for a seamless integration. You can also add external downlighter to enhance and highlight your conservatory. The lights can be installed as either a cool or warm white and can be specified with a twilight sensor, turning the lights on automatically as natural light fades.

light up your conservatory with our new soffit eaves and downlighters

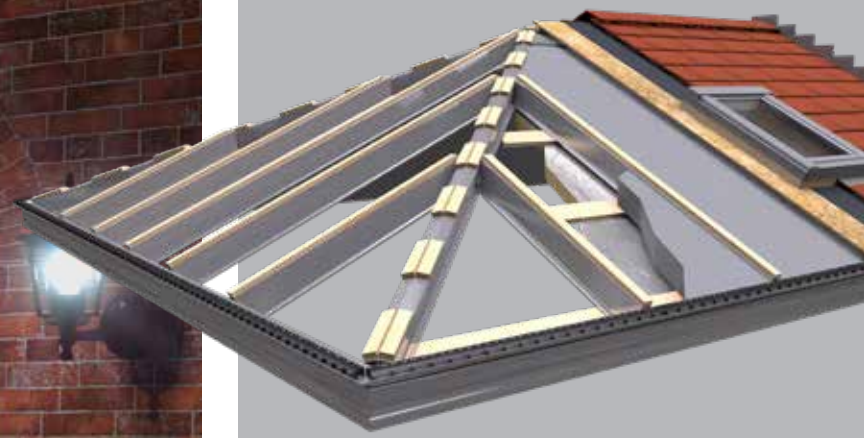
New & Improved



Improved ventilation

Aluminium rafters in the lightweight roof have been separated from the 18mm OSB timber deck to increase the air gap. Providing a clean flow of air through the roof system. The enhanced ventilation of our system allows the roof to breathe adequately reducing the risk of any condensation.

Energy efficiency

New high performance styrene helps boost overall roof energy efficiency and thermal insulation to keep the room below comfortable enough to use at any time of year.

Structural strength

Upgraded boarding in the roof system sandwich increases overall strength to allow larger areas without risk of sagging.

BEFORE

What a transformation

Complete installation in 48 hours

A hassle-free solution

This advanced premium-quality roof system has been designed for straightforward hassle-free installation onto your existing conservatory, so you can look forward to minimal disruption to your home life. In fact, Equinox can be installed in as little as 48 hours. It's the perfect replacement for a tired looking traditional conservatory roof, or to turn a new conservatory into a year-round living space.

No job is too small

Equinox isn't just a great system for conservatory roofs either. This versatile solution can also be used to transform flat roofs – whether you are building a new extension or you have an existing flat roof that's ready for a change.

In fact, no job's too small for Equinox. Even porches can benefit from a contemporary makeover.

Create a perfect space

Outstanding versatility for your living spaces

Equinox tiled roof systems are compatible with all types of conservatories – whether it's a small lean-to or a large-scale P-shaped design – we can truly transform any space to suit your needs. Hipped or mono-pitch designs can easily be achieved, and the traditional aesthetics of Equinox ensures your roof will complement your conservatory and its surrounding environment – whatever you choose to use it for.

Clever inside

A fully ventilated roof system

Clever inside

The innovative multi-layered roof design can transform your space and your lifestyle.

Pocket energy bill savings

The fully insulated roof design achieves U-values as low as 0.15 – roughly 10 times more efficient than an A-rated window. This exceptional thermal performance minimises heat loss – which translates into reduced energy bills.

365-day comfort

Enjoy your conservatory whatever the weather! Come rain or shine, you will experience comfortable temperatures all year round with an Equinox tiled roof.

Reduce noise and glare

Glass and polycarbonate roofs produce glare in direct sunlight and become noisy during rain or hail showers. Equinox dramatically reduces these issues so you can use your space undisturbed.

A new lease of life

Equinox tiled roofs offer the inspiration to transform an under-used room into a desirable living space.

Imagine a place to relax with wine and friends, to spend more time with the kids, or to simply kick back in – just you and the TV remote.

Whatever you want out of your conservatory – Equinox can help create your own personal sanctuary.

The internal surfaces of your Equinox roof are finished with insulated plasterboard creating the look and feel of a conventional home extension.

If you want to maintain a light, bright and airy environment, then optional roof windows will flood your conservatory with natural light – without the harsh summer glare of traditional conservatories. Our premium quality roof windows are available with a choice of features – just ask your installer for more information.

Let more natural light in

Innovation that takes Equinox to a whole new level

Natural light is a welcome guest in every home. So Eurocell engineers have developed an innovative way for homeowners to invite the maximum light levels in. Equinox Vega takes the system to a whole new level in terms of size, strength, efficiency and illumination.

More light

Equinox Vega features large glazed areas allowing up to 850mm widths of visible natural light for brighter, sunlit conservatories that give an impression of even more space.
